## 3D-Gamer

*VIEW 3D CONTENTS VIA PS3 ON ANY DLP DISPLAY*

3D-GAMER IS A CONVERTER BOX THAT FITS IN BETWEEN PLAYSTATION PS3 AND A DLP DISPLAY VIA A HDMI CABLE CONNECTION TO ALLOW 3D CONTENTS TO BE VIEWED IN 3D.

KEY ITEMS	
	Display must be DLP
	Must have a PS3
	Contents must be 3D
	Must have HDMI Cable
	Must have 3D Glasses

**3D ACTIVE SHUTTER GLASSES** are required to view the image in 3D via VIP 3D-Gamer converter.

### How to Install

Remove 3D-Gamer from the box and attach one HDMI cable in the HDMI IN connector and another HDMI cable in the HDMI OUT connector.

Take the HDMI IN cable and connect it to PS3. Now, take the HDMI OUT cable and attach it to the back of your display. You are ready with your installation.

#### OPTIONAL

You may wish to connect a USB cable from 3D-Gamer to either your PS3 or to your display to ensure proper power delivery. This is a recommended step to ensure operation with all games.

3d-Gamer does not need to face the front and may be put in the back in a safe place.

### How to begin Operating

Once connected, you may go ahead and use your PS3 as normal. The 3D contents will be automatically recognized and setup to display in 3D without having to set or reset any settings. Should you fail to see 3D contents, check to make sure everything is powered up and the HDMI cables are securely connected on both ends.

## Troubleshooting

**3D-Gamer does not require a lot of troubleshooting and should work right out of the box.** Should you run into problems with viewing contents in 3D, please take the following steps:

- 1- Make sure PS3 is powered
- 2- Make sure 3D-Gamer is powered and the indicator light is on.
- 3- Make sure you have actually setup your PS3 to enable 3D output. Go to Settings -> Display settings -> Video Output and select “automatic” so that 3D is enabled.
- 4- If you are using your projector for audio and the sound quality is poor, make sure you disable 5.1 sound from the PS3. 3D-gamer will pass 5.1 but your projector may not be able to understand it. You can do this in Audio settings – menu in PS3.
