THE POWER OF STATE-OF-THE-ART DIGITAL TECHNOLOGY

Based on an advanced digital architecture, the BARCO 800 series projectors offer an outstanding array of performance specifications including a number of special features designed to simplify the use and installation of the projector.

On-screen displays, menu-driven installation adjustments, infrared remote control, LDI (Linear Digital Interpolation), internal memory banks and automatic storing of user settings are just a few features of the user-friendly BARCO 800 series projectors.

◀ The extreme flexibility of the BARCODATA 800 makes it the perfect solution for dynamic large audience presentations.
Photo : EBES, Antwerp
(Installation: Comsys)

The BARCODATA 800 is ideal for the projection of high quality computer data for boardroom meetings, training sessions, software ▼ presentations,...

HIGH GRADE OPTICAL SYSTEM SUPERB PICTURE QUALITY

The implementation of an advanced, state-of-the-art optical system allows the BARCO 800 projectors to deliver razor sharp images, with a high light output of 825 lumens, on screens from 1.2 m (4 ft.) up to 6 m (20 ft.) wide.

- High-definition, liquid cooled 8" square CRTs with stabilized pressure chambers offer a consistently superb picture.
- F1.06 color corrected, hybrid lenses deliver an optical resolution of 10 lp/mm and improved image contrast.

▲ The wide autolock circuitry of the BARCOGRAPHICS 800 (15-90 kHz horizontal, 37-140 Hz vertical) make it ideally suited for ultra high-resolution applications, like CAD/CAM/CAE imaging, process control/monitoring, and simulation.

Convenient, well organized on-screen menus (available in several languages), combined with the user-friendly infrared remote control unit, simplifies all adjustments of the BARCOGRAPHICS 800 and the BARCODATA 800, even for first-time and non-skilled users.

MENU-DRIVEN CONTROL UNEQUALLED USER-FRIENDLINESS

For easy geometry and convergence adjustment, the BARCO 800 projectors combine a user-friendly remote control unit with logical on-screen menus.

The projectors offer a guided adjustment program for first-time or non-skilled users, and a random adjustment mode for more efficient alignment of image parameters by experienced users.

Image adjustments may be accomplished 'on source', or through the use of an internally generated pattern, genlocked on the connected source or to a pre-programmed frequency, to allow for adjustment of the projector in the absence of an external source.

All image adjustments are individually set for each source and stored in one of the projector's 38 frequency related memory banks. Once image parameters are designated for each source, the BARCO 800 projectors will automatically select the correct settings for the source in use, giving you a perfect picture.

Once parameters are selected for at least two sources, the LDI (Linear Digital Interpolation) feature of the BARCO 800 projectors will automatically calculate the image parameters of all additional sources by comparing them to previously set sources, to approximate all new source settings.

COMPUTER DRIVEN ASSISTANCE PROJECTOR SUPPORT SOFTWARE PACKAGE

Thanks to BARCO's optional proprietary 'Control 800' software package, it is possible to adjust brightness, contrast, hue, color, sharpness and geometry and convergence settings for up to 256 projectors from one central point. It is even possible to store image settings for each source for future

use on a computer hard disk or diskette.

The 'Control 800' software is available for use with IBM PC, PS/2 (or compatible), Macintosh, Intergraph Clipper Workstation or computers working with the X-Window operating system.

▲ Mouse-driven pull-down menus and dialogue boxes facilitate the adjustment of the projectors connected to the central computer.

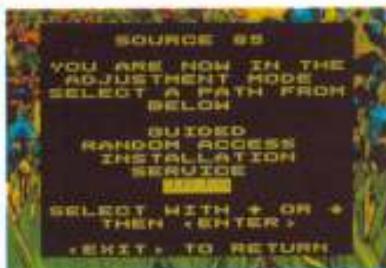

IRIS 800 : INTELLIGENT REGISTRATION INTERFACE SYSTEM

The IRIS 800 is an optional user-friendly, automatic convergence system designed to automatically align the projected image on the screen faster and more accurately than ever before possible through the conventional 'manual' convergence process.

The IRIS 800 incorporates a unique hardware/software system, which utilizes a high resolution CCD camera in

conjunction with an ultra light, high quality front-surface mirror assembly. Together with built-in digital enhancement software this guarantees both a quick and highly accurate alignment of the three projected images on the screen, even under heavy ambient lighting conditions.

The flexible design of the IRIS 800 allows it to operate either in a table or ceiling mount installation.

▲ The IRIS 800's automatic convergence process is easily initiated by selecting the appropriate option from the projector's on-screen menu, using the infrared remote control.

The RCVDS 800 allows for the connection of up to 10 different video and data sources to one BARCO 800 series projector, and the adjustment of all picture settings via a convenient infrared remote control.

ADDITIONAL PERIPHERAL DEVICES

BARCO offers a wide range of additional peripheral devices, which further enhance the flexibility and versatility of the BARCO 800 series projectors.

RCVDS 800 versatile source selector

The Remote Controlled Video and Data Source Selector RCVDS 800 makes it possible to connect up to ten sources to the projector and to adjust all picture settings via the projector's infrared remote control.

For expanded use of the 800-series projectors, it is possible to connect up to ten RCVDS 800 source selectors in series, so that up to 90 different sources may be connected simultaneously to a single projector.

RCU 800-U

The RCU 800-U is a simplified executive infrared remote control unit, designed to accommodate source selection and adjustment

of user settings without allowing changes to the projector's geometry and convergence settings.

Remote infrared receiver

An additional remote infrared receiver facilitates the use of the projector's infrared remote control in difficult installations.

Communication cables

Additional RS232/422 cables (D9/D9), with a length of 15 or 30 m are available.

Suspension system

BARCO's suspension system allows any BARCO 800 series projector to be mounted from the ceiling, adapting the projector perfectly to the local mounting requirements.

Flight case

Sturdy, easily transportable flight case, for the packing of the BARCO 800 projectors.

The convenient RCU 800-U allows easy control of source switching and user settings per source. ▼

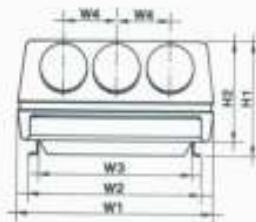

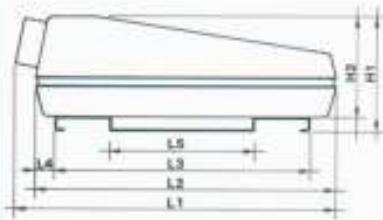

TECHNICAL SPECIFICATIONS

800 SERIES	BARCODATA 800	BARCOGRAPHICS 800
Scan frequencies :		
Horizontal	15-58 kHz autolock	15-90 kHz autolock
Vertical	37-140 Hz autolock	37-140 Hz autolock
Minimal retrace time :		
Horizontal	< 3.3 µs	< 2.6 µs
Vertical	< 300 µs	< 200 µs
RGB bandwidth :	> 50 MHz	> 60 MHz
Optical Scheimpflug correction :	No	Yes

COMMON SPECIFICATIONS 800 SERIES

Light output* :	- geometry per source (password protected)
At 10% peak white : 825 lumen	
At 20% peak white : 575 lumen	- convergence per source (password protected)
CRTs:	
High brightness, high definition liquid cooled 8" CRTs.	
Lenses:	Inputs :
High definition, fully color corrected F1.06 hybrid lenses, with centre+edge focus adjustment.	<ul style="list-style-type: none"> - RGB analog (BNC-connectors), sync on green or separate sync - RGB TTL/EGA (D9-subconnector) - Video (PAL, SECAM, NTSC 4.43, NTSC 3.58), looped through (2xBNC), with 75 Ohm termination switch - 4 pin S-Video input, looped through with 75 Ohm termination switch.
Optical resolution :	Optical Scheimpflug correction :
10 lp/mm at 50 % MTF throughout the field.	The BARCOGRAPHICS 800 is provided with a built-in Scheimpflug optical correction, with stepless adjustments for both horizontal and vertical axis. This feature guarantees optimal optical focus from left to right and top to bottom for projection under non-standard angles, and is particularly useful for specialized installations.
Screen size :	
Min. : 1.2 m x 0.9 m (4' x 3')	
Max. : 6 m x 4.5 m (19.8' x 14.8')	
Horizontal linearity :	
> 97% accuracy in the full horizontal frequency range.	
Remote control :	
User-friendly infrared remote control RCU 800 controls :	
- source switching	
- user settings per source (sharpness, hue, color, brightness, contrast)	

Dimensions

	MM	INCH
L 1	1000	39.37
L 2	870	34.25

*Measurement method available upon request

Special features :

- 38 frequency-related memory banks.
- L.D.I. (Linear Digital Interpolation).
- Effective on-screen display : installation screens, help screens, barscale display of user settings, on-screen display of source frequencies.
- Automatic storing of all adjustments.
- Ability to set parameters to midposition.
- Color temperature adjustment : 3200 K, 6500 K, 9300 K, or custom).
- Special sharpness control : improves picture quality for high-frequency sources.
- Text generators for other languages.
- A BARCODATA 800 can be upgraded to a BARCOGRAPHICS 800.

- RCVDS 800 :

- 220 V : 98 27450
- 110 V : 98 27459

- Control 800 Software :

- PC, PS/2 : 98 27530

- Mac : 98 27540

- Intergraph Clipper : 98 27580

- X-Window system : 98 27710

- IRIS 800 : 98 27690

- RCU 800-U : 98 27440

- Remote Infrared receiver : 98 27510

- Communication cables :

- 15 m : 98 27560

- 30 m : 98 27570

- Suspension system : 98 27340

- Flight case : 98 27520
