

ClearVideo™ 3

Component Video to VGA Video Adapter, with convenient loop-throughs and automatic input sensing

ClearVideo™ 3 is the world's smallest video adapter for connecting your component video devices to VGA monitors and projectors. It supports most interlaced and progressive video formats, like 480p, 720p, 1080i/540p, NTSC, PAL. ClearVideo™ 3 is ideal for driving your VGA displays from your component video HDTV Set Top Box, video game (like Xbox and Game Cube), or progressive-scan DVD player.

- Simple to operate, plug and play
- Connects your component video products (like video games, DVD players, and HDTV Set Top Boxes) to your VGA display
- Crystal-clear video, driving your VGA monitor with cable lengths up to 50 feet
- Input and Output scanning formats are the same (performs no video processing)
- Convenient and intelligent Input/Output features, like:
 - Special VGA input lets you permanently hook up ClearVideo™ 3 to your existing PC and VGA monitor set-up
 - Key Digital's IAS (Intelligent Auto Sense) circuitry automatically switches the active VGA source to the display
 - Component video loop-through
 - Flexible Output Sync formats
